

# GOOD BETTER GRAHAM

## REAL-WORLD PROTECTION FOR TODAY'S BUILT ENVIRONMENT

The harsh realities of today's built environment can require very unusual windows. Graham Architectural Products makes windows of uncommon quality for even special applications – for a safer, more pleasant interior environment.

*"Good, Better, Graham" means the best windows for your needs.*

The primary source of noise intrusion in both homes and buildings is through the

windows. Graham is a leader in the battle against noise pollution in building interiors. Using the right window in educational facilities can mean the difference between performance-enhancing quiet and learning-challenging chaos. Graham's acoustically-rated fenestration products are available in structural aluminum or PVC, in a full spectrum of window styles, STC levels, and operating systems. Sound solutions for commercial, institutional, and residential environments.

Graham has joined The War on Terror with a full line of blast mitigation windows. With

federal agencies mandating windows for public buildings that meet Level II GSA certification test criteria for bomb blast threats, Graham has responded with reinforced blast mitigation products in casement, double-hung, and fixed configurations. Blast mitigation for historical renovation projects are a specialty, thanks to Graham's extensive selection of proprietary architectural design tools.

Graham offers a high-performance, durable alternative to aluminum, PVC, and clad-wood

windows. Pultruded fiberglass is an advanced framing material that expands at the same rate as glass, so that all components work together for superior condensation protection. Graham fiberglass windows are available in casement, double-hung, sliding windows and doors, plus a terrace swing door. Choose them for lower U-values, superior wind-load resistance, and long life, even in challenging chemical or salt air environments.

- Architectural • Heavy Commercial
- Acoustical Windows • Sliding Glass Doors
- Terrace Doors • Bomb Blast • Hurricane

## Graham Provides Windows for Two Lake Tahoe Marriott Resort Properties

Lake Tahoe, CA - Graham Architectural Products has replaced the original windows in historic hotels from coast to coast, include San Francisco's Mark Hopkins and Philadelphia's Ritz Carlton properties.

Last year, Graham tackled two new-construction Marriott ski resort hotel projects in South Lake Tahoe, California. Graham manufactured 604 Series 2075 single hung commercial aluminum windows for Marriott's Timber Lodge. Applied muntins and River Rouge 50% Kynar paint complement the red brick building exterior. Also installed: 18 Graham 0900 Series sliding glass doors. Installation was by Custom Glass. For The Marriott Grand Residence Club, contractor A-1 Glass installed 899 Graham Series 6700 fixed and casement windows, 157 fixed Series 1450 windows, and 158 Series 7000 terrace doors. Preset panning and 1-1/2" internal muntins complemented the exterior in Duranar River Rouge paint.

## Historic El Segundo High Restored To Former Glory with Graham Thermal Windows

El Segundo, CA - El Segundo High School, located in the Southern California village of the same name, is known for high academic achievement and for its signature Mission-style bell tower.

*El Segundo High School, El Segundo, CA*

In 1997, as part of a three-phase \$49 million renovation and new construction program, Graham Architectural Products was selected to replace all the windows in the original brick structure, built in 1927.

Graham installed 73 large thermally-improved Series 6700 structural aluminum windows. The new fixed and awning-style low-e glass windows not only outperform the originals, they successfully replicate their true-divided-lite muntins and graceful arch tops. A historically accurate pre-set panning system emulates the appearance of the building's original architecture.

## GOOD, BETTER, GRAHAM

*means the best  
windows for your needs.*

Since 1972, Graham Architectural Products has been providing building owners and architects with some of the industry's highest-quality commercial windows and glass doors. Whether customers are looking for hurricane-impact resistant, blast mitigation products, or acoustical windows in casement, hung, dual action, sliding, fixed, or projected window style, Graham offers many choices.

The company's sliding glass doors and terrace doors are perfect complements for Graham windows. Graham's current marketing theme, GOOD, BETTER, GRAHAM, conveys the message that architects and owners can always expect the best windows for their needs

## LA JOLLA HI-RISE RETIREMENT COMMUNITY

La Jolla, CA - The Pacific Regent is a 21-story luxury retirement high-rise offering the ultimate in individual comfort and convenience, built in 1991.

Last year, when it came time to replace the building's original windows, Graham

installed 1,885 Series 6600 heavy commercial aluminum fixed and casement windows. The tinted insulated glazing system is PPG Artic Blue. Luxurious Graham terrace swing doors with one-inch glazing completed the project.
